

TripWire Pull

(2 pin Higo)

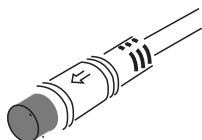

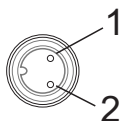

Add-on brake sensor switch

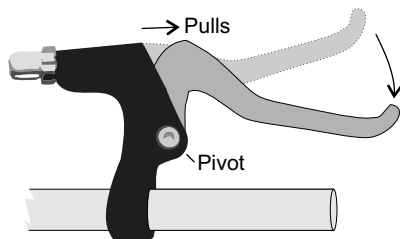

Part #: TripWire_Pull_Higo2

- Add-on switch for existing brake lever
- Manufactured in USA
- Rugged and Watertight Construction
- Total Length: 106cm
- 2 pin Higo Connector
- Should be compatible with Sondors ebikes and other 2 pin Higo brakes

Typical Mechanical Lever

Pinout:

1 and 2 are shorted when brake is applied

This is the Pull version, suited to mechanical brake levers and some hydraulics. A push version is also available for levers with a different pivot geometry.
