Grin Technologies
205-950 Powell Street
Vancouver, BC V6A 1H9

Part #: TripWire_Pull_Higo3

- Add-on switch for existing brake lever
- Manufactured in USA
- Rugged and Watertight Construction
- Total Length: 50cm
- 3 pin Higo Connector
- Should be compatible with most Bafang BBS kits

Typical Mechanical Lever

Pinout:

1 and 2 are shorted when brake is applied
3 is not connected

This is the Pull version, suited to mechanical brake levers and some hydraulics. A push version is also available for levers with a different pivot geometry.
